

VIC

STYLISH AND MODERN

Video information console

VIC is an IP-console intended for control of alarm, fire protection and access control systems from a modern interactive user interface with touch screen.

The console can be used as either a device for arm/disarm of alarm system, or as an "indication panel", which displays information about security system state and provides management functions.

At that, VIC provides the user with access to the functions of the system as a whole, and not just to a specific controller or panel.

By design, VIC is a tablet computer intended to

be mounted on walls or embedded into walls or other constructions. The appearance and design requirements can be agreed at the design stage of the corresponding system.

"Out-of-the-box" VIC works with YARS and BOREY controllers and with MTK. Thanks to the capabilities of the ITRIUM®Soft integration platform, VIC is also able to monitor and control third-party equipment.

New opportunities

Emphasize your status

A stylish and high-tech product attracts the visitors attention. Put the company logo or any image of your choice on the screen.

Unified interface

Interact with all facility subsystems from one device with the help of applications for monitoring, control and video verification.

For your business

Use the console screen in standby mode for displaying ads or advertisements (feature available on request).

Interior solution

Elegant device for an elegant interior. Various appearances and designs are available on request.

Easy and safe

A simple and intuitive interface allows VIC to be used by an unprepared user. Use a card or a PIN as credentials to protect against unauthorized actions.

Care for attendance

Use VIC as a self-service terminal for time and attendance control (feature available on request).

VIC specifications¹⁾

Communication interfaces	1x LAN Ethernet 1x USB (Host) Optional: WiFi / Bluetooth
Power	POE IEEE802.3af DC 9 – 24 V
CPU	AllWinner A20, 1200 MHz, 2 cores
GPU	Mali 400 MP2
RAM	1 GB
Embedded memory	4 GB
OS	Linux (Ubuntu Linaro) Automatic switching on and load when power is applied
Indication and control	1x color multi-touch capacitive IPS screen, 7 in., 1024x600 1x embedded audio indicator No buttons
Dimensions	246mm x 143mm x 27.5 mm Wall-mount
Weight	1 kg Aluminum with glass
Temperatue	-20°C ÷ +50°C (storage and transportation) 0°C ÷ +50°C (operation)
Humidity	0.85%, non condensing

¹⁾ VIC is a versatile platform for creating custom applications. On request, we can adapt VIC to your tasks and business needs.
